# KANDARP MATHUR

**AI PRODUCT MANAGER | PRODUCT OWNER | AGENTIC AI & PRODUCT DELIVERY**

Ahmedabad, India | mathurkandarp@gmail.com | +91 810 990 1136 | linkedin.com/in/kandarpmathur14

## PROFESSIONAL SUMMARY

Product Owner and AI product builder experienced in translating market research, customer feedback and business needs into AI-agent concepts, product requirements, user workflows and delivery roadmaps. At AltaDX, lead product and delivery across four pods for OMAP®, an agentic AI platform for fitness and wellness operators. Translate complex capabilities into workflows non-technical users can configure, while managing roadmap priorities, delivery capacity, release readiness and stakeholder reporting. Outside my full-time role, build AI products hands-on, including Round1, an AI voice-interview screening platform whose first client has conducted 153 interviews over the last three months.

## CORE SKILLS

**Product strategy & discovery:** Market and competitor research, customer discovery, problem framing, agent opportunity assessment, capability prioritisation, roadmap planning, MVP definition

**AI product management:** Agentic AI workflows, PRDs, human-in-the-loop design, retrieval-grounded generation (RAG), evaluation and scoring guardrails, AI quality review

**Product design & analysis:** User journeys, business rules, clickable HTML prototypes, process documentation, user stories, acceptance criteria, KPI frameworks

**Delivery leadership:** Four-pod coordination, capacity planning, backlog management, sprint planning and reviews, Agile ceremonies, risk/dependency tracking, stakeholder reporting

**Tools:** Jira, Jira Product Discovery, Confluence, Slack workflows, Cursor, Claude Code, GitHub

**Technical fluency:** Next.js, TypeScript, Supabase, OpenAI, Deepgram, ElevenLabs, APIs, SQL, Power BI, Excel, Snowflake, Databricks

## PROFESSIONAL EXPERIENCE

### Product Owner & Project Manager — OMAP® | AltaDX

*Ahmedabad, India | Jun 2025 – Present*

Own product definition and delivery for OMAP®, an agentic AI platform that enables fitness and wellness businesses to configure digital agents for their operations.

- **Product discovery & strategy:** Research competing products, gather client feedback and evaluate agent capabilities to help determine what to build, improve or remove based on customer needs and product value.
- **Product ownership:** Helped evolve OMAP® from its initial Concierge Agent into a platform with nine distinct agent types, including Concierge, Playbook, Collections, Sales, Receptionist, Member Audit and Click2Save, alongside No-Show and Chargeback workflows.
- **Product definition:** Translate agent concepts into configurable workflows by defining agent behaviour, user journeys, setup flows and business rules; write PRDs and product documentation and create clickable HTML prototypes for design refinement.
- **Roadmap & backlog:** Partner with Business Analysts to turn product ideas into Jira Product Discovery items, roadmap initiatives, user stories and acceptance criteria; own product and sprint backlogs and plan work three sprints ahead.
- **Team & delivery leadership:** Coordinate delivery across four pods and a multidisciplinary group of 17 developers, two Business Analysts, and Data Engineering, AI Engineering and RPA contributors; manage capacity, dependencies, sprint planning, reviews and stakeholder updates.
- **Sprint execution & reporting:** Improved sprint planning and execution practices, contributing to fewer spillovers and more timely releases. Improved sprint-reporting accuracy by separating QA holds from development work and distinguishing new commitments from QA-found defects; revised reporting showed 7.5% scope growth versus 64.5% previously reported.
- **Release management:** Established a structured release process covering code freeze, UAT, regression testing and release readiness, supported by Jira automations and coordination across multiple stakeholders.
- **Product workflow improvement:** Defined Collections Agent Outreach Intelligence from concept through PRD and Jira-ready story, keeping cohort recommendations advisory-only and grounded in available event data. Simplified setup by removing duplicate Email/SMS configuration and moving recurring dues import to a dedicated page.
- **Release scope validation:** Validated Receptionist Agent requirements against Jira and source code, identifying nonexistent ticket references and a previously deleted routing feature before release scope was committed.

**Platform scale & outcomes:** As of October 2026, platform-level metrics include nine distinct agent types; 63 live agent deployments across 309 locations and 44 active customers; 600,000+ conversations; 71,000 client hours saved; and $1,753,015 collected across multiple agents. Recent release: OMAP® 2.10.0.

### Business Analyst | KTek Resourcing | India | Jan 2019 – Mar 2025

- Led requirements analysis, solution design and delivery coordination for recruitment systems, API integrations and enterprise reporting.
- Translated stakeholder needs into specifications, user stories and testable acceptance criteria to align business and technical teams.
- Improved candidate onboarding efficiency by 30% through workflow redesign, automation and tighter stakeholder feedback loops.

### Reporting Analyst | Wealth IT Global | India | Jan 2014 – Dec 2018

- Reduced manual reporting effort by 40% through automation, scheduled refreshes and standardised KPI definitions using Excel, Power BI and SQL.

### Trainer | Qpid Outsourcing | India | Jun 2013 – Dec 2013

- Designed and delivered learning programmes, standard operating procedures and cross-functional workshops.

## FOUNDER EXPERIENCE

### Founder & Product Owner — Round1

*round1.in | Nov 2025 – Present*

- Building an AI voice-based first-round interview screening platform with adaptive, job-description-led interviews and recruiter reports featuring recommendations, skill ratings, transcripts, an integrity signal and PDF output.
- Started building in November 2025; first client onboarded on 2 July 2026. The client has conducted 153 interviews over the last three months, demonstrating ongoing product usage.
- Audited interview outputs and refined scoring guardrails, including 80/20 technical-to-communication weighting, a minimum-answer gate, named recommendation bands and integrity signals that constrain recommendations without being treated as proof.
- Improved mobile interview reliability by moving speech capture server-side and refining the mobile-first interview experience.

### Founder & Mentor — Analystbychance

*analystbychance.com | Ongoing*

- Founded a one-to-one mentorship initiative helping recruiters, HR and staffing professionals transition into Business Analyst, Scrum Master and Product Owner roles while remaining employed.
- Structured the programme around a guided 3–5 month learning sequence, live mentoring, mock interviews and placement support.

## SELECTED WEEKEND PRODUCT PROJECTS

- **Chirppy — AI Real Estate Lead Assistant:** Defined and built a demo-ready AI chatbot MVP for Indian real-estate developers, combining brochure-grounded answers, Hinglish conversations, lead qualification, EMI estimates and site-visit booking. Designed retrieval rules to avoid invented pricing and RERA claims.
- **Ask Mandy — Voice Mock Interview:** Designed a paid, no-account voice mock-interview experience with role-based booking and scored feedback; defined assessment guardrails based on questions actually answered.
- **Nivesh Pustika — Trading Journal:** Built a free trading-journal web app/PWA for Indian markets with rupee P&L calculations, F&O lot-size handling and performance dashboards.

## EDUCATION & CERTIFICATIONS

- **Product Management with Gen and Agentic AI:** BITSoM – Masai (Pursuing)
- **Bachelor of Engineering, Mechanical Engineering:** Rajiv Gandhi Prodyogiki Vishwavidyalaya (RGPV) | 2009–2013

**Certifications:** Certified ScrumMaster (CSM®) | SAFe® 6 Product Owner / Product Manager | Salesforce Certified AI Associate
